Methods and constructs

Theoretical

Computational methods for electronic structure

Calculation of the electronic and photoelectronic spectra of nitroso compounds: a reinvestigation by use of configuration interaction methods, S. Lacombe, M. Loudet, A. Dargelos and J.M. Camou 258 (2000) 1

Mass spectra and theoretical modeling of Li^+Ne_n, Li^+Ar_n and Li^+Kr_n clusters, G.E. Froudakis, S.C. Farantos and M. Velegrakis 258 (2000) 13

A theoretical study on a Diels–Alder reaction in ambient and supercritical water: viewing solvent effects through frontier orbitals, Y. Harano, H. Sato and F. Hirata 258 (2000) 151

Cooperativity and hydrogen bonding network in water clusters, S.S. Xantheas 258 (2000) 225

-CI and valence bond approach

An experimental and theoretical study of the $HNCO^+$ ion, S. Wilsey, S.E. Thomas and J.H.D. Eland 258 (2000) 21

-perturbative and many body approaches

Cooperativity and hydrogen bonding network in water clusters, S.S. Xantheas 258 (2000) 225

-density functional theory

Computation of the pK of liquid water using coordination constraints, M. Sprik 258 (2000) 139

Structural and dynamical behavior of an azide anion in water from ab initio molecular dynamics calculations, D.A. Yarne, M.E. Tuckerman and M.L. Klein 258 (2000) 163

Semiempirical methods

Analysis of the bound odd-parity spectrum of krypton by weakest bound electron potential model theory, N.W. Zheng, T. Zhou, R. Yang, T. Wang and D. Ma 258 (2000) 37

Wavefunctions for highly excited and unbound states

Calculation of the electronic and photoelectronic spectra of nitroso compounds: a reinvestigation by use of configuration interaction methods, S. Lacombe, M. Loudet, A. Dargelos and J.M. Camou 258 (2000) 1

PII: S0301-0104(00)00221-4

Collisional and reactive molecular dynamics with non-frictional forces
State selected reactions of krypton ions with methane, A. Kok, P.A.Z. van Emmichoven and A. Niehaus 258 (2000) 47

Intramolecular dynamics
The interatomic potentials and dipole moments of the excited 1_u state of Cd–Cd and ^{3}1 state of Cd–Ar, G.D. Roston and M.S. Helmi 258 (2000) 55
A theoretical study on a Diels–Alder reaction in ambient and supercritical water: viewing solvent effects through frontier orbitals, Y. Harano, H. Sato and F. Hirata 258 (2000) 151

Molecular dynamics of many particle systems and condensed phases
Mass spectra and theoretical modeling of Li^+Ne_n, Li^+Ar_n and Li^+Kr_n clusters, G.E. Froudakis, S.C. Farantos and M. Velegrakis 258 (2000) 13
The anomalous Stark effect of single terrylene molecules in *p*-terphenyl crystals, P. Bordat, M. Orrit, R. Brown and A. Würger 258 (2000) 63
The structure of water from 25°C to 457°C: comparison between neutron scattering and molecular simulation, A.A. Chialvo, E. Yezdimer, T. Driesner, P.T. Cummings and J.M. Simonson 258 (2000) 109
The radial distribution functions of water and ice from 220 to 673 K and at pressures up to 400 MPa, A.K. Soper 258 (2000) 121
Computation of the p*K* of liquid water using coordination constraints, M. Sprik 258 (2000) 139
Solvation structures in three dimensions, I.M. Svishchev, A.Yu. Zassetsky and P.G. Kusalik 258 (2000) 181
A multi-state empirical valence bond model for acid–base chemistry in aqueous solution, M. Čuma, U.W. Schmitt and G.A. Voth 258 (2000) 187
Extent of inter-hydrogen bond correlations in water. Temperature effect, A. Luzar 258 (2000) 267
Slow dynamics in supercooled water, F. Sciortino 258 (2000) 307
A theoretical analysis of the sum frequency generation spectrum of the water surface, A. Morita and J.T. Hynes 258 (2000) 371
The role of water in B-DNAs B_I to B_{II} conformer substates interconversion: a combined study by calorimetry, FT-IR spectroscopy and computer simulation, A. Pichler, S. Rüdisser, R.H. Winger, K.R. Liedl, A. Hallbrucker and E. Mayer 258 (2000) 391
Semi-grand canonical molecular dynamics simulation of bovine pancreatic trypsin inhibitor, G.C. Lynch and B.M. Pettitt 258 (2000) 405

Quasiparticle dynamics (incl. excitons, polarons)
The lowest energy Frenkel and charge-transfer excitons in quasi-one-dimensional structures: application to MePTCDI and PTCDA crystals, M. Hoffmann, K. Schmidt, T. Fritz, T. Hasche, V.M. Agranovich and K. Leo 258 (2000) 73

Statistical computational methods (incl. Monte Carlo)
Structure of NaI ion pairs in water clusters, G.H. Peslherbe, B.M. Ladanyi and J.T. Hynes 258 (2000) 201
New perspectives on hydrophobic effects, G. Hummer, S. Garde, A.E. García and L.R. Pratt 258 (2000) 349
Semi-grand canonical molecular dynamics simulation of bovine pancreatic trypsin inhibitor, G.C. Lynch and B.M. Pettitt 258 (2000) 405

Equilibrium statistical mechanics and thermodynamics
Structure of NaI ion pairs in water clusters, G.H. Peslherbe, B.M. Ladanyi and J.T. Hynes 258 (2000) 201
Extent of inter-hydrogen bond correlations in water. Temperature effect, A. Luzar 258 (2000) 267
On the origin of the heat capacity feature of annealed ices and ice clathrates, and interpreting water's diffusivity in terms of the entropy, G.P. Johari 258 (2000) 277
New perspectives on hydrophobic effects, G. Hummer, S. Garde, A.E. García and L.R. Pratt 258 (2000) 349
Semi-grand canonical molecular dynamics simulation of bovine pancreatic trypsin inhibitor, G.C. Lynch and B.M. Pettitt 258 (2000) 405
Hydration structure of the α-chymotrypsin substrate binding pocket: the impact of constrained geometry, C. Carey, Y.-K. Cheng and P.J. Rossky 258 (2000) 415
Nature of collagen–water hydration forces: a problem in water structure, G.E. Walrafen and Y.-C. Chu 258 (2000) 427

Time and space correlation functions
Solvation structures in three dimensions, I.M. Svishchev, A.Yu. Zassetsky and P.G. Kusalik 258 (2000) 181
Structure of NaI ion pairs in water clusters, G.H. Peslherbe, B.M. Ladanyi and J.T. Hynes 258 (2000) 201

Experiment

Molecular spectroscopy
The interatomic potentials and dipole moments of the excited 1_u state of Cd–Cd and ^{3}1 state of Cd–Ar, G.D. Roston and M.S. Helmi 258 (2000) 55

-infrared
Reorientational motion and hydrogen-bond stretching dynamics in liquid water, H.J. Bakker, S. Woutersen and H.-K. Nienhuys 258 (2000) 233
The role of water in B-DNAs B_I to B_{II} conformer substates interconversion: a combined study by calorimetry, FT-IR spectroscopy and computer simulation, A. Pichler, S. Rüdisser, R.H. Winger, K.R. Liedl, A. Hallbrucker and E. Mayer 258 (2000) 391

-Raman
Nature of collagen–water hydration forces: a problem in water structure, G.E. Walrafen and Y.-C. Chu 258 (2000) 427

-UV
Calculation of the electronic and photoelectronic spectra of nitroso compounds: a reinvestigation by use of configuration interaction methods, S. Lacombe, M. Loudet, A. Dargelos and J.M. Camou 258 (2000) 1

-visible
The lowest energy Frenkel and charge-transfer excitons in quasi-one-dimensional structures: application to MePTCDI and PTCDA crystals, M. Hoffmann, K. Schmidt, T. Fritz, T. Hasche, V.M. Agranovich and K. Leo 258 (2000) 73

Photoelectron and Auger spectroscopy
Calculation of the electronic and photoelectronic spectra of nitroso compounds: a reinvestigation by use of configuration interaction methods, S. Lacombe, M. Loudet, A. Dargelos and J.M. Camou 258 (2000) 1
An experimental and theoretical study of the $HNCO^+$ ion, S. Wilsey, S.E. Thomas and J.H.D. Eland 258 (2000) 21
State selected reactions of krypton ions with methane, A. Kok, P.A.Z. van Emmichoven and A. Niehaus 258 (2000) 47

Multiphoton ionization
Liquid water ionization: mechanistic implications of the H/D isotope effect in the geminate recombination of hydrated electrons, M.U. Sander, M.S. Gudiksen, K. Luther and J. Troe 258 (2000) 257

Laser induced fluorescence
The anomalous Stark effect of single terrylene molecules in *p*-terphenyl crystals, P. Bordat, M. Orrit, R. Brown and A. Würger 258 (2000) 63

Ultrafast measurements
Low-temperature elastic anomalies in an anthracene single crystal, M. Fukuhara, A.H. Matsui and M. Takeshima 258 (2000) 97

Nonlinear optics and spectroscopy
A theoretical analysis of the sum frequency generation spectrum of the water surface, A. Morita and J.T. Hynes 258 (2000) 371

Atomic and molecular beam techniques
The self-diffusivity of amorphous solid water near 150 K, R.S. Smith, Z. Dohnálek, G.A. Kimmel, K.P. Stevenson and B.D. Kay 258 (2000) 291

Mass spectroscopy
Mass spectra and theoretical modeling of Li^+Ne_n, Li^+Ar_n and Li^+Kr_n clusters, G.E. Froudakis, S.C. Farantos and M. Velegrakis 258 (2000) 13
An experimental and theoretical study of the $HNCO^+$ ion, S. Wilsey, S.E. Thomas and J.H.D. Eland 258 (2000) 21
State selected reactions of krypton ions with methane, A. Kok, P.A.Z. van Emmichoven and A. Niehaus 258 (2000) 47

X-ray, electron and neutron diffraction
The radial distribution functions of water and ice from 220 to 673 K and at pressures up to 400 MPa, A.K. Soper 258 (2000) 121
Anomalous X-ray diffraction studies of hydration effects in concentrated aqueous electrolyte solutions, S. Ramos, A.C. Barnes, G.W. Neilson and M.J. Capitan 258 (2000) 171

Neutron scattering (inelastic and quasielastic)
The structure of water from 25°C to 457°C: comparison between neutron scattering and molecular simulation, A.A. Chialvo, E. Yezdimer, T. Driesner, P.T. Cummings and J.M. Simonson 258 (2000) 109

Generalized frequency spectra of water at both sides of the freezing transition, J. Dawidowski, F.J. Bermejo, C. Cabrillo and S.M. Bennington 258 (2000) 247
Extent of inter-hydrogen bond correlations in water. Temperature effect, A. Luzar 258 (2000) 267
Relaxational dynamics of water molecules at protein surface, S. Dellerue and M.-C. Bellissent-Funel 258 (2000) 315

Small angle X-ray and neutron diffraction
Structural studies of water in confined geometry by neutron diffraction, J. Dore 258 (2000) 327

Calorimetric methods
On the origin of the heat capacity feature of annealed ices and ice clathrates, and interpreting water's diffusivity in terms of the entropy, G.P. Johari 258 (2000) 277
The role of water in B-DNAs B_I to B_{II} conformer substates interconversion: a combined study by calorimetry, FT-IR spectroscopy and computer simulation, A. Pichler, S. Rüdisser, R.H. Winger, K.R. Liedl, A. Hallbrucker and E. Mayer 258 (2000) 391

Objects

Bulk systems

Gases
Calculation of the electronic and photoelectronic spectra of nitroso compounds: a reinvestigation by use of configuration interaction methods, S. Lacombe, M. Loudet, A. Dargelos and J.M. Camou 258 (2000) 1
Mass spectra and theoretical modeling of Li^+Ne_n, Li^+Ar_n and Li^+Kr_n clusters, G.E. Froudakis, S.C. Farantos and M. Velegrakis 258 (2000) 13

Liquids neat
The structure of water from 25°C to 457°C: comparison between neutron scattering and molecular simulation, A.A. Chialvo, E. Yezdimer, T. Driesner, P.T. Cummings and J.M. Simonson 258 (2000) 109
The radial distribution functions of water and ice from 220 to 673 K and at pressures up to 400 MPa, A.K. Soper 258 (2000) 121
Reorientational motion and hydrogen-bond stretching dynamics in liquid water, H.J. Bakker, S. Woutersen and H.-K. Nienhuys 258 (2000) 233
Generalized frequency spectra of water at both sides of the freezing transition, J. Dawidowski, F.J. Bermejo, C. Cabrillo and S.M. Bennington 258 (2000) 247
Liquid water ionization: mechanistic implications of the H/D isotope effect in the geminate recombination of hydrated electrons, M.U. Sander, M.S. Gudiksen, K. Luther and J. Troe 258 (2000) 257
Extent of inter-hydrogen bond correlations in water. Temperature effect, A. Luzar 258 (2000) 267
Slow dynamics in supercooled water, F. Sciortino 258 (2000) 307
Structural studies of water in confined geometry by neutron diffraction, J. Dore 258 (2000) 327

Liquid mixtures and solutions
Computation of the pK of liquid water using coordination constraints, M. Sprik 258 (2000) 139

A theoretical study on a Diels–Alder reaction in ambient and supercritical water: viewing solvent effects through frontier orbitals, Y. Harano, H. Sato and F. Hirata 258 (2000) 151
Structural and dynamical behavior of an azide anion in water from ab initio molecular dynamics calculations, D.A. Yarne, M.E. Tuckerman and M.L. Klein 258 (2000) 163
Anomalous X-ray diffraction studies of hydration effects in concentrated aqueous electrolyte solutions, S. Ramos, A.C. Barnes, G.W. Neilson and M.J. Capitan 258 (2000) 171
A multi-state empirical valence bond model for acid–base chemistry in aqueous solution, M. Čuma, U.W. Schmitt and G.A. Voth 258 (2000) 187
New perspectives on hydrophobic effects, G. Hummer, S. Garde, A.E. García and L.R. Pratt 258 (2000) 349

Crystals

-neat

The lowest energy Frenkel and charge-transfer excitons in quasi-one-dimensional structures: application to MePTCDI and PTCDA crystals, M. Hoffmann, K. Schmidt, T. Fritz, T. Hasche, V.M. Agranovich and K. Leo 258 (2000) 73
On the origin of the heat capacity feature of annealed ices and ice clathrates, and interpreting water's diffusivity in terms of the entropy, G.P. Johari 258 (2000) 277

-mixed

The anomalous Stark effect of single terrylene molecules in *p*-terphenyl crystals, P. Bordat, M. Orrit, R. Brown and A. Würger 258 (2000) 63

Glasses

On the origin of the heat capacity feature of annealed ices and ice clathrates, and interpreting water's diffusivity in terms of the entropy, G.P. Johari 258 (2000) 277
The self-diffusivity of amorphous solid water near 150 K, R.S. Smith, Z. Dohnálek, G.A. Kimmel, K.P. Stevenson and B.D. Kay 258 (2000) 291
The role of water in B-DNAs B_I to B_{II} conformer substates interconversion: a combined study by calorimetry, FT-IR spectroscopy and computer simulation, A. Pichler, S. Rüdisser, R.H. Winger, K.R. Liedl, A. Hallbrucker and E. Mayer 258 (2000) 391

Complex fluids

Solvation structures in three dimensions, I.M. Svishchev, A.Yu. Zassetsky and P.G. Kusalik 258 (2000) 181

Polymers

Low-temperature elastic anomalies in an anthracene single crystal, M. Fukuhara, A.H. Matsui and M. Takeshima 258 (2000) 97

Thin films

The self-diffusivity of amorphous solid water near 150 K, R.S. Smith, Z. Dohnálek, G.A. Kimmel, K.P. Stevenson and B.D. Kay 258 (2000) 291

Surfaces

A theoretical analysis of the sum frequency generation spectrum of the water surface, A. Morita and J.T. Hynes 258 (2000) 371

Microscopic and mesoscopic systems

Single atoms, molecules and assemblies (incl. biological)

Analysis of the bound odd-parity spectrum of krypton by weakest bound electron potential model theory, N.W. Zheng, T. Zhou, R. Yang, T. Wang and D. Ma 258 (2000) 37
The anomalous Stark effect of single terrylene molecules in *p*-terphenyl crystals, P. Bordat, M. Orrit, R. Brown and A. Würger 258 (2000) 63

Molecules (neutral and ionic)

An experimental and theoretical study of the $HNCO^+$ ion, S. Wilsey, S.E. Thomas and J.H.D. Eland 258 (2000) 21
State selected reactions of krypton ions with methane, A. Kok, P.A.Z. van Emmichoven and A. Niehaus 258 (2000) 47
The structure of water from 25°C to 457°C: comparison between neutron scattering and molecular simulation, A.A. Chialvo, E. Yezdimer, T. Driesner, P.T. Cummings and J.M. Simonson 258 (2000) 109
Anomalous X-ray diffraction studies of hydration effects in concentrated aqueous electrolyte solutions, S. Ramos, A.C. Barnes, G.W. Neilson and M.J. Capitan 258 (2000) 171

-diatomic

The interatomic potentials and dipole moments of the excited 1_u state of Cd–Cd and ^{3}1 state of Cd–Ar, G.D. Roston and M.S. Helmi 258 (2000) 55

-small polyatomics

The radial distribution functions of water and ice from 220 to 673 K and at pressures up to 400 MPa, A.K. Soper 258 (2000) 121

-aromatics

The lowest energy Frenkel and charge-transfer excitons in quasi-one-dimensional structures: application to MePTCDI and PTCDA crystals, M. Hoffmann, K. Schmidt, T. Fritz, T. Hasche, V.M. Agranovich and K. Leo 258 (2000) 73

-polymeric and biological

Hydration structure of the α-chymotrypsin substrate binding pocket: the impact of constrained geometry, C. Carey, Y.-K. Cheng and P.J. Rossky 258 (2000) 415

Molecular aggregates

Structural and dynamical behavior of an azide anion in water from ab initio molecular dynamics calculations, D.A. Yarne, M.E. Tuckerman and M.L. Klein 258 (2000) 163
Cooperativity and hydrogen bonding network in water clusters, S.S. Xantheas 258 (2000) 225

-dimers

Low-temperature elastic anomalies in an anthracene single crystal, M. Fukuhara, A.H. Matsui and M. Takeshima 258 (2000) 97

-van der Waals molecules

The interatomic potentials and dipole moments of the excited 1_u state of Cd–Cd and ^{3}1 state of Cd–Ar, G.D. Roston and M.S. Helmi 258 (2000) 55

-clusters
Mass spectra and theoretical modeling of Li^+Ne_n, Li^+Ar_n and Li^+Kr_n clusters, G.E. Froudakis, S.C. Farantos and M. Velegrakis 258 (2000) 13
Structure of NaI ion pairs in water clusters, G.H. Peslherbe, B.M. Ladanyi and J.T. Hynes 258 (2000) 201
Cooperativity and hydrogen bonding network in water clusters, S.S. Xantheas 258 (2000) 225

Liquid–liquid and liquid–solid interfaces
Relaxational dynamics of water molecules at protein surface, S. Dellerue and M.-C. Bellissent-Funel 258 (2000) 315
Hydration structure of the α-chymotrypsin substrate binding pocket: the impact of constrained geometry, C. Carey, Y.-K. Cheng and P.J. Rossky 258 (2000) 415
Nature of collagen–water hydration forces: a problem in water structure, G.E. Walrafen and Y.-C. Chu 258 (2000) 427

Biological assemblies, cells and organelles
Nature of collagen–water hydration forces: a problem in water structure, G.E. Walrafen and Y.-C. Chu 258 (2000) 427

Proteins
Relaxational dynamics of water molecules at protein surface, S. Dellerue and M.-C. Bellissent-Funel 258 (2000) 315
New perspectives on hydrophobic effects, G. Hummer, S. Garde, A.E. García and L.R. Pratt 258 (2000) 349

Nucleic acids
The role of water in B-DNAs B_I to B_{II} conformer substates interconversion: a combined study by calorimetry, FT-IR spectroscopy and computer simulation, A. Pichler, S. Rüdisser, R.H. Winger, K.R. Liedl, A. Hallbrucker and E. Mayer 258 (2000) 391

Phenomena

Molecular structure
Cooperativity and hydrogen bonding network in water clusters, S.S. Xantheas 258 (2000) 225

Vibrations and rotations of molecules
Structural and dynamical behavior of an azide anion in water from ab initio molecular dynamics calculations, D.A. Yarne, M.E. Tuckerman and M.L. Klein 258 (2000) 163
Reorientational motion and hydrogen-bond stretching dynamics in liquid water, H.J. Bakker, S. Woutersen and H.-K. Nienhuys 258 (2000) 233
Generalized frequency spectra of water at both sides of the freezing transition, J. Dawidowski, F.J. Bermejo, C. Cabrillo and S.M. Bennington 258 (2000) 247

Electronic structure and states
An experimental and theoretical study of the $HNCO^+$ ion, S. Wilsey, S.E. Thomas and J.H.D. Eland 258 (2000) 21

Analysis of the bound odd-parity spectrum of krypton by weakest bound electron potential model theory, N.W. Zheng, T. Zhou, R. Yang, T. Wang and D. Ma 258 (2000) 37
The lowest energy Frenkel and charge-transfer excitons in quasi-one-dimensional structures: application to MePTCDI and PTCDA crystals, M. Hoffmann, K. Schmidt, T. Fritz, T. Hasche, V.M. Agranovich and K. Leo 258 (2000) 73

Molecular interactions
The interatomic potentials and dipole moments of the excited 1_u state of Cd–Cd and ^{3}1 state of Cd–Ar, G.D. Roston and M.S. Helmi 258 (2000) 55
The radial distribution functions of water and ice from 220 to 673 K and at pressures up to 400 MPa, A.K. Soper 258 (2000) 121
Structure of NaI ion pairs in water clusters, G.H. Peslherbe, B.M. Ladanyi and J.T. Hynes 258 (2000) 201
On the origin of the heat capacity feature of annealed ices and ice clathrates, and interpreting water's diffusivity in terms of the entropy, G.P. Johari 258 (2000) 277
New perspectives on hydrophobic effects, G. Hummer, S. Garde, A.E. García and L.R. Pratt 258 (2000) 349

Reactions (incl. dissociation)
A theoretical study on a Diels–Alder reaction in ambient and supercritical water: viewing solvent effects through frontier orbitals, Y. Harano, H. Sato and F. Hirata 258 (2000) 151

-collisional
State selected reactions of krypton ions with methane, A. Kok, P.A.Z. van Emmichoven and A. Niehaus 258 (2000) 47

-condensed phase
Liquid water ionization: mechanistic implications of the H/D isotope effect in the geminate recombination of hydrated electrons, M.U. Sander, M.S. Gudiksen, K. Luther and J. Troe 258 (2000) 257
Extent of inter-hydrogen bond correlations in water. Temperature effect, A. Luzar 258 (2000) 267

Tunneling
The anomalous Stark effect of single terrylene molecules in *p*-terphenyl crystals, P. Bordat, M. Orrit, R. Brown and A. Würger 258 (2000) 63

Proton and hydrogen atom transfer
Computation of the p*K* of liquid water using coordination constraints, M. Sprik 258 (2000) 139
A multi-state empirical valence bond model for acid–base chemistry in aqueous solution, M. Čuma, U.W. Schmitt and G.A. Voth 258 (2000) 187

Ionization (incl. Rydberg states)
Analysis of the bound odd-parity spectrum of krypton by weakest bound electron potential model theory, N.W. Zheng, T. Zhou, R. Yang, T. Wang and D. Ma 258 (2000) 37
Liquid water ionization: mechanistic implications of the H/D isotope effect in the geminate recombination of hydrated electrons, M.U. Sander, M.S. Gudiksen, K. Luther and J. Troe 258 (2000) 257

Molecular motion (incl. diffusive)
Relaxational dynamics of water molecules at protein surface, S. Dellerue and M.-C. Bellissent-Funel 258 (2000) 315

Isotopic effects
Liquid water ionization: mechanistic implications of the H/D isotope effect in the geminate recombination of hydrated electrons, M.U. Sander, M.S. Gudiksen, K. Luther and J. Troe 258 (2000) 257

Surface chemical physics
The self-diffusivity of amorphous solid water near 150 K, R.S. Smith, Z. Dohnálek, G.A. Kimmel, K.P. Stevenson and B.D. Kay 258 (2000) 291
A theoretical analysis of the sum frequency generation spectrum of the water surface, A. Morita and J.T. Hynes 258 (2000) 371

Thermodynamic and transport properties
The self-diffusivity of amorphous solid water near 150 K, R.S. Smith, Z. Dohnálek, G.A. Kimmel, K.P. Stevenson and B.D. Kay 258 (2000) 291
Slow dynamics in supercooled water, F. Sciortino 258 (2000) 307

Structure of solids, liquids and glasses
The structure of water from 25°C to 457°C: comparison between neutron scattering and molecular simulation, A.A. Chialvo, E. Yezdimer, T. Driesner, P.T. Cummings and J.M. Simonson 258 (2000) 109
Solvation structures in three dimensions, I.M. Svishchev, A.Yu. Zassetsky and P.G. Kusalik 258 (2000) 181
Semi-grand canonical molecular dynamics simulation of bovine pancreatic trypsin inhibitor, G.C. Lynch and B.M. Pettitt 258 (2000) 405
Nature of collagen–water hydration forces: a problem in water structure, G.E. Walrafen and Y.-C. Chu 258 (2000) 427

Critical behaviour and phase transitions
Low-temperature elastic anomalies in an anthracene single crystal, M. Fukuhara, A.H. Matsui and M. Takeshima 258 (2000) 97

Biomolecular structure–function relationships
Semi-grand canonical molecular dynamics simulation of bovine pancreatic trypsin inhibitor, G.C. Lynch and B.M. Pettitt 258 (2000) 405
Hydration structure of the α-chymotrypsin substrate binding pocket: the impact of constrained geometry, C. Carey, Y.-K. Cheng and P.J. Rossky 258 (2000) 415
